GREAT FOR RELAXATION See entry for Years K-2. This volume is directed at the content of the student workbooks for years 3-6. Wilfrid Gordon McDonald Partridge lives next door to a nursing home. Gerald tells of the very unusual animals he would add to the zoo, if he were in charge. "Hattie the Hen spots the danger--but no one seems to care!" --Pg 4 of cover. This volume focuses on the (de)canonization processes in children ' s literature, considering the construction and cultural-historical changes of canons in different children ' s literatures. Chapters by international experts in the field explore a wide range of different children ' s literatures from Great Britain, Germany, Scandinavia, the Low Countries, Eastern and Central Europe, as well as from Non-European countries such as Australia, Israel, and the United States. Situating the inquiry within larger literary and cultural studies conversations about canonicity, the contributors assess representative authors and works that have encountered changing fates in the course of canon history. Particular emphasis is given to sociological canon theories, which have so far been under-represented in canon research in children ' s literature. The volume therefore relates historical changes in the canon of children ' s literature not only to historical changes in concepts of childhood but to more encompassing political, social, economic, cultural, and ideological shifts. This volume ' s comparative approach takes cognizance of the fact that, if canon formation is an important cultural factor in nation-building processes, a comparative study is essential to assessing transnational processes in canon formation. This book thus renders evident the structural similarities between patterns and strategies of canon formation emerging in different children ' s literatures. Semiotic Margins analyses the meaning making potential of not only language, but modalities like laughter, music, colour, and architectural spaces. By examining resources often positioned on the side-line of mainstream semiotic accounts, this study raises the

question of what counts as part of language and communication and why. Beginning with the more established nonverbal resources of communication, four major themes of modalities of meaning are covered. The investigation of music and space looks at how semiotic systems in classical music interact. Using children's books, the relationship between images and verbal meaning is then explored, presenting implications for student literacy as well as a methodology for supporting children excluded from mainstream literary practices. Finally new approaches to transcribing representations in screen-based technologies are presented through an examination of television advertisements. Semiotic Margins will appeal to linguists and semioticians wishing to pursue research in systemic functional linguistics and multimodal discourse analysis.
