In nine eventful years - 1957 to 1965 - the six-cylinder-engined Austin Healey evolved into a formidable and increasingly specialised rally car. By any standards, it was the first of the "homologation specials" - a type made progressively stronger, faster, more versatile, and more suitable for the world's toughest International rallies. Though the motorsport foundations had been laid by the Healey Motor Co. Ltd, the work needed to turn these cars into rock-solid 210bhp projectiles was almost all completed by the world-famous "works" BMC Competitions Department at Abingdon. It was because of their vast experience that the "Big Healeys" as they were always affectionately known - became fast and tough, nimble yet durable, so that they were capable of winning major events wherever traction could be assured. Not only did the "works" Austin Healeys win some of the world's most famous events - including Liege-Sofia-Liege, Spa-Sofia-Liege and the French and Austrian Alpine rallies, but they were also supremely fast on events like the Tulip, and came so close, so often, to winning their home event, the British RAC Rally, which traditionally ended the season. Not only did these cars turn their drivers - Pat Moss, Donald Morley, Rauno Aaltonen, Timo Makinen and Paddy Hopkirk among them - into heroes, but individual cars seemed to take on a character and reputation of their own. This book lists each and every success, each and every notable car, and traces exactly how

the machinery developed, and improved, from one season to the next. Over time, the "works" cars not only adopted aluminium cylinder heads and body panels, much-modified chassis, transmission and exhaust systems, but they also became supremely strong and could withstand a true battering on the world's toughest events. This book relates how the cars were improved by the engineers, how the drivers came to love their heavy and sometimes self-willed steeds, and how the management team got the most out of everything - machinery, personnel, drivers, and regulations. . Heavily illustrated and packed with technical detail this book will make a welcome addition to any motorsport fans library. Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.
